Chapter-1: Proposed System Requirement Analysis

1.1 Definition

An online website customer to easy online booking a farmhouse offering seamless platform for a show cast and selling a good quality farmhouse with there price , rating that based on customer. It is customized like that customer can choose farmhouse for their enjoyment, events even it helps to customer based on suggestion to manage their events and also it will provide package based on their requirement.

1.2 Objective

The objective of the Farmhouse Booking System is to provide an easy and reliable online platform for booking farmhouses. It aims to reduce the traditional manual process of searching and booking, which often takes more time and effort. Through this system, customers can easily find different farmhouses, compare them based on price, facilities, and reviews, and make quick bookings. It also ensures that all the necessary details are available in one place so that users can take better decisions. The platform saves time for customers by avoiding repeated phone calls and physical visits. At the same time, it provides farmhouse owners with a simple way to manage their listings, availability, and reservations. The system makes the entire process transparent and convenient for both parties. It also supports digitalization of the booking process, making farmhouses more accessible to a larger audience. In this way, the system creates a smooth experience for customers and helps owners grow their business.

1.3 Purpose

The purpose of this website is to help people easily find and book great farmhouses online for fun, events, or get-togethers. It shows clear prices, real customer reviews, and helps plan events by suggesting the best options and packages to fit what customers need. The goal is to make booking and organizing a farmhouse simple, fast, and enjoyable for everyone.

- **Purpose:-**

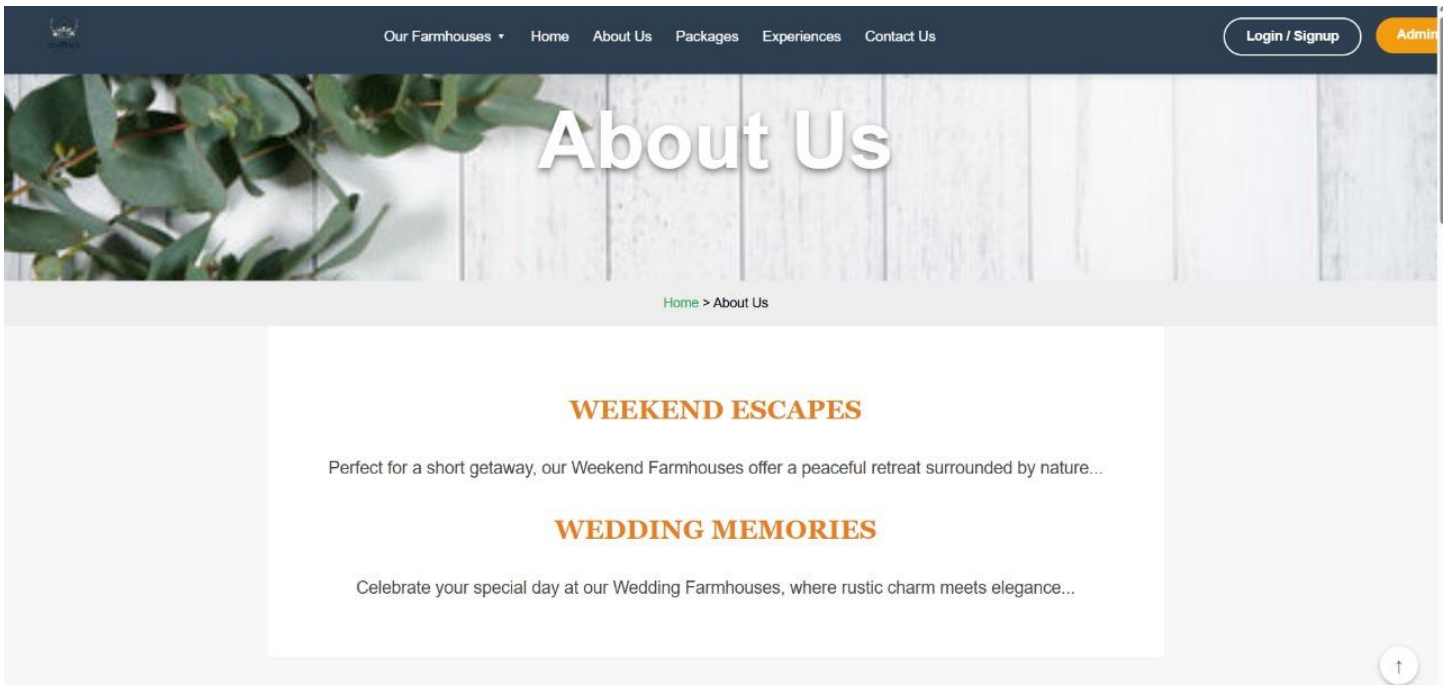
  - The website is built to help people book farmhouses for weekends, weddings, or events. It shows the places, facilities, and guest reviews so people can trust and choose easily. The aim is to give visitors a mix of comfort, nature, and celebration options.

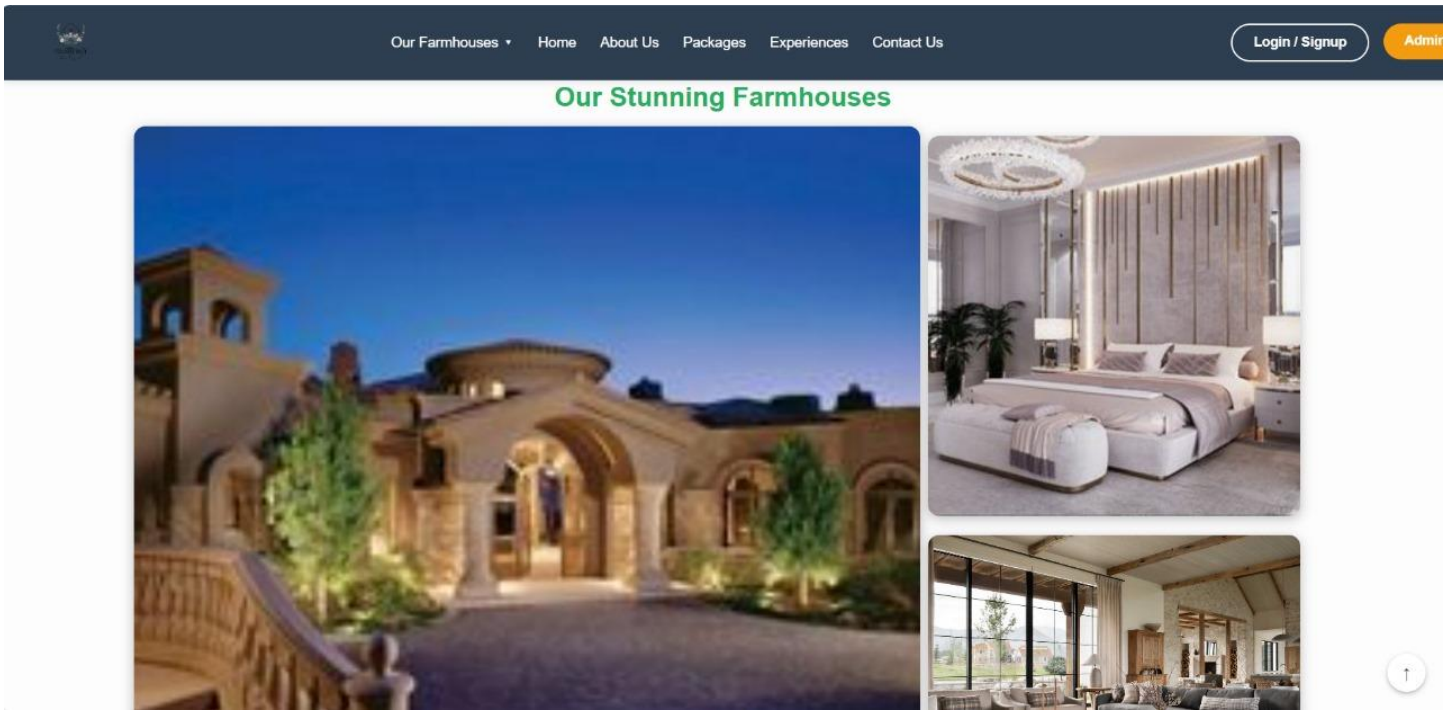
- **Design Goal:-**

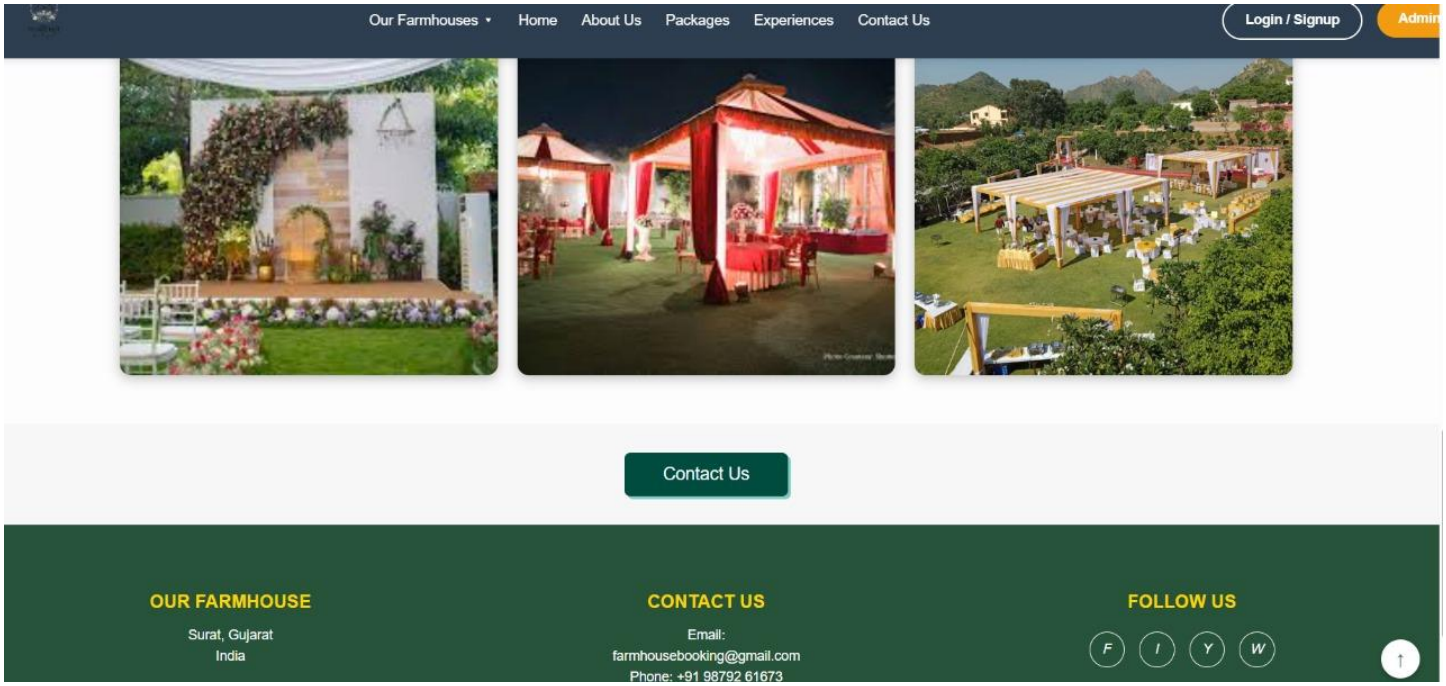
  - The design is made to look simple, modern, and easy to use. Big pictures and clean layouts help people understand quickly. Buttons like Book Now and Explore guide visitors step by step. The goal is to make booking smooth and enjoyable.

3.2 Screenshot of Other UI Pages :-

1. About us Page:







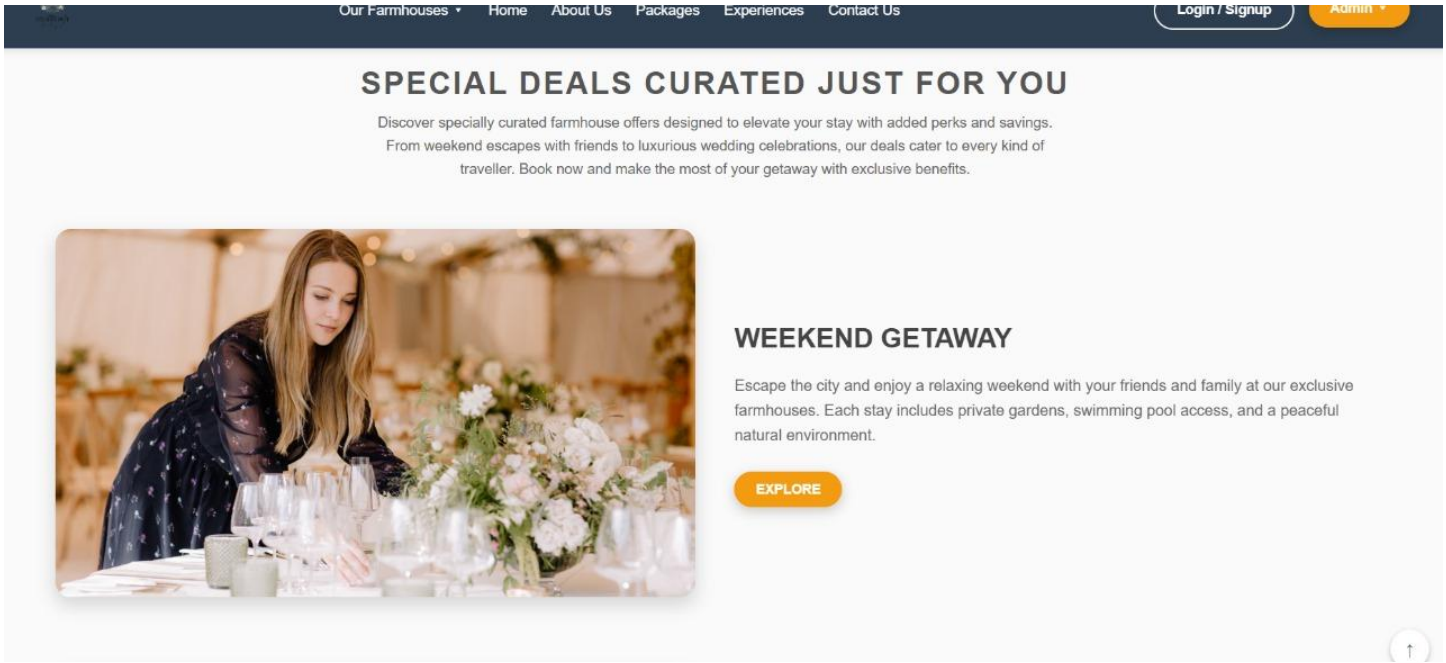
Purpose:-

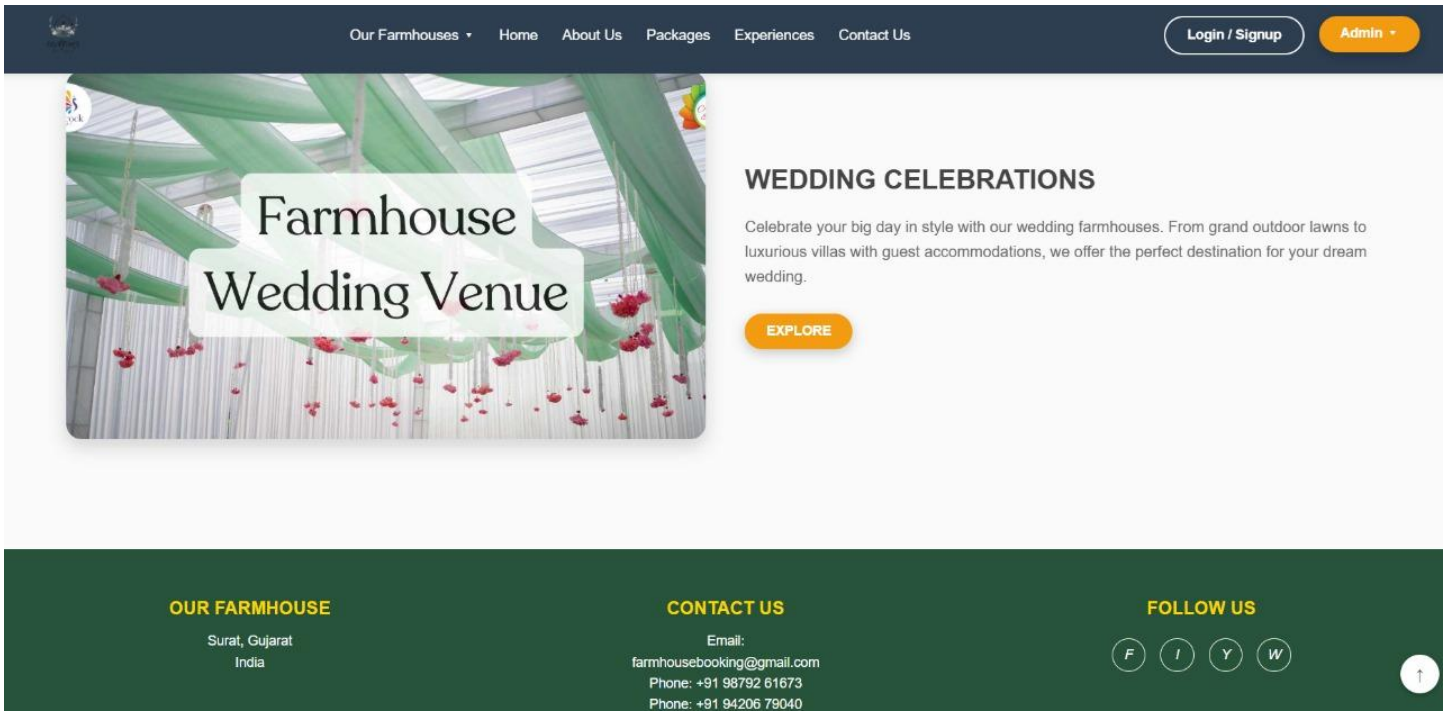
- This page serves as the About Us section of the Farmhouse Booking Website. Its purpose is to introduce visitors to different farmhouse experiences like weekend escapes and wedding celebrations, while reinforcing the brand's values of relaxation, luxury, and elegance. It also provides a visual farmhouse gallery with modal popups for detailed viewing, along with quick navigation to the contact page for inquiries or bookings.

Design Goals:-

- The design aims to create a warm and inviting experience for users through a hero header, breadcrumb navigation, and storytelling sections about farmhouse offerings. The gallery grid with modal lightbox enhances visual engagement, while responsive layouts ensure smooth browsing across devices. Interactive elements like hover effects, modal navigation, and a call-to-action button guide users toward making contact, aligning with the overall goal of building trust and encouraging bookings.

2.Package page:





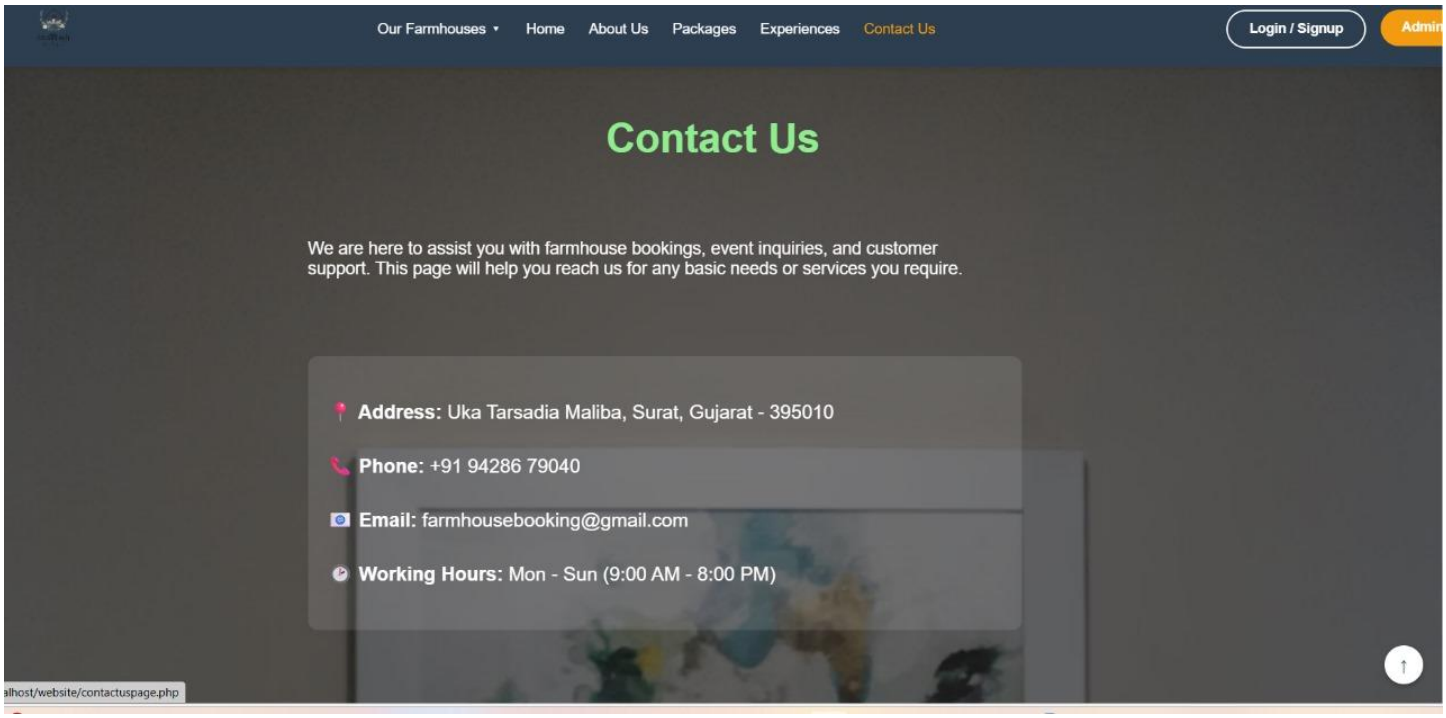
Purpose

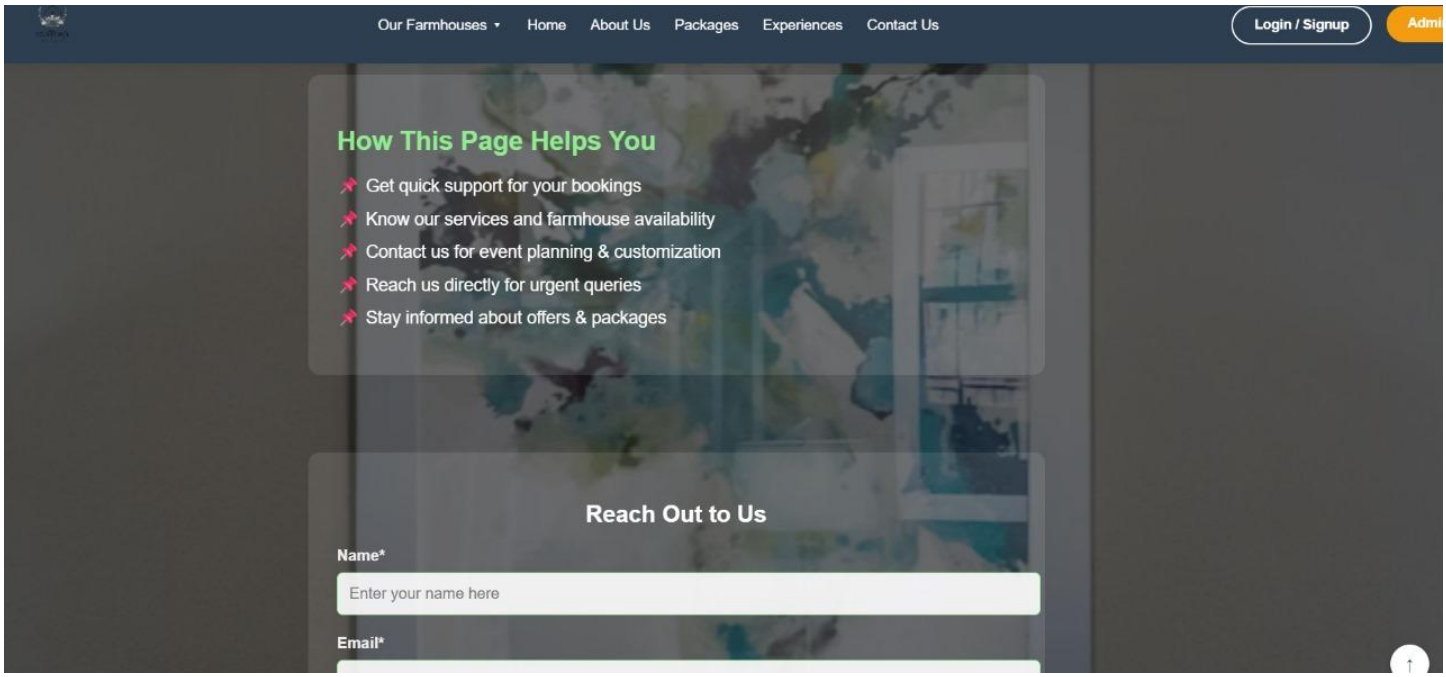
- The purpose of this page is to present special farmhouse offers tailored to different guest needs, such as weekend getaways and wedding celebrations. It highlights exclusive perks like free Wi-Fi, decor consultation, and flexible check-in, while also providing a booking form at the top for quick reservations. This page serves as a promotional showcase to attract customers with curated deals and convert visits into bookings.

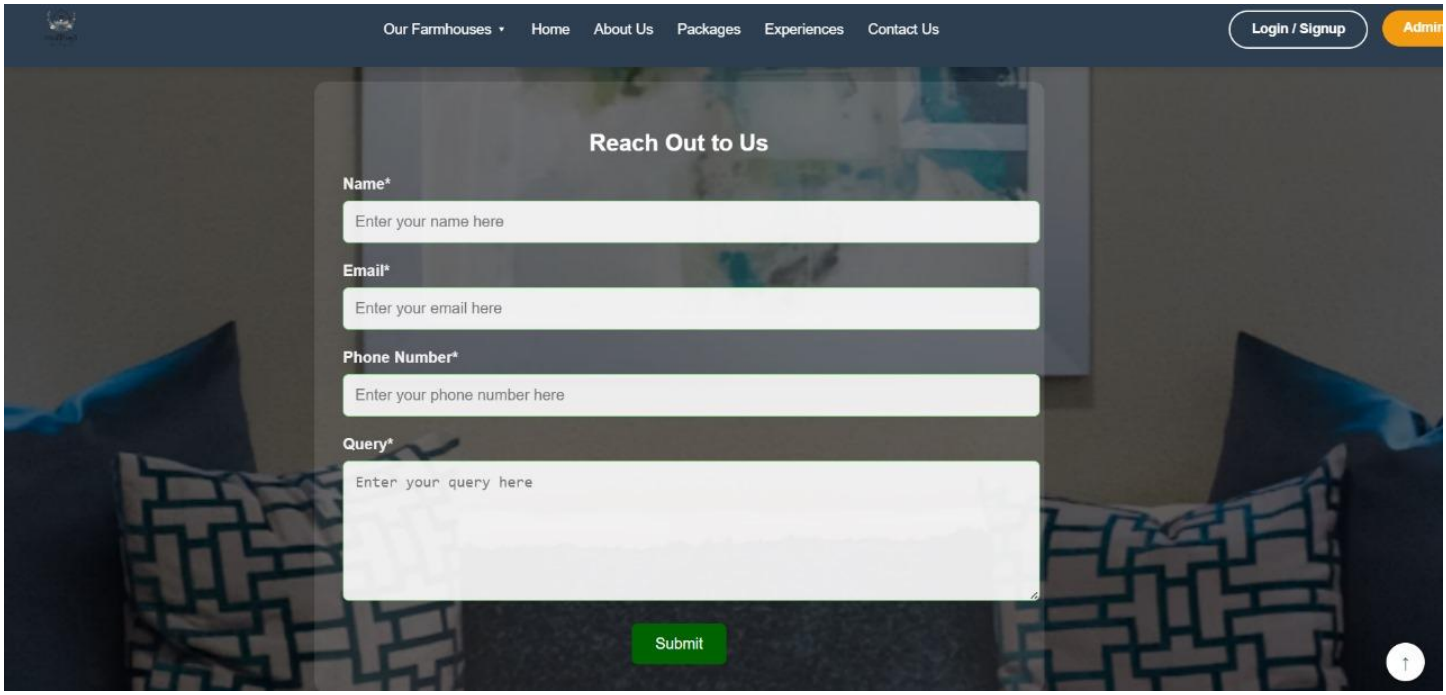
Design Goals

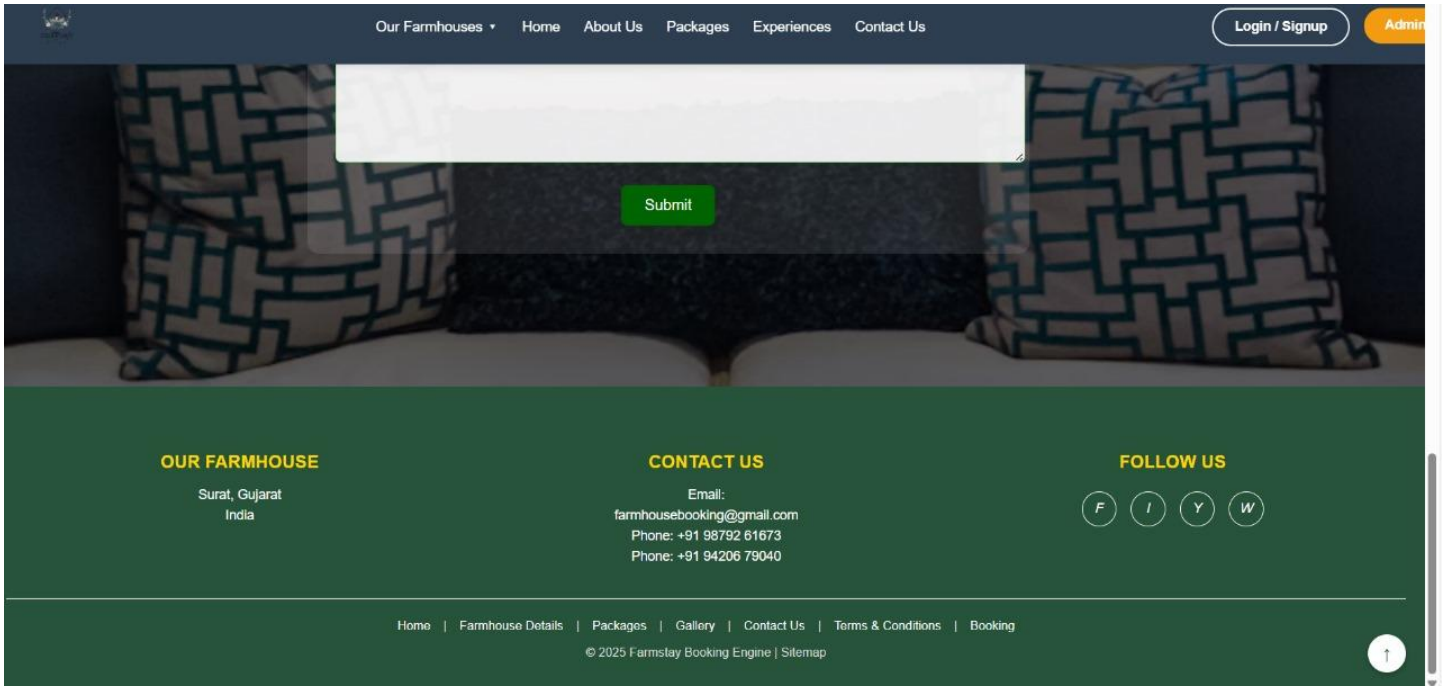
- The design focuses on creating a visually appealing and persuasive layout with a hero section, booking box, and alternating offer sections with engaging images. Subtle animations, hover effects, and tooltips are used to enhance interactivity while maintaining a clean and modern aesthetic. Each offer has a dedicated image, description, and call-to-action button, making it easy for users to explore packages. The overall goal is to boost engagement, highlight value-added benefits, and encourage direct bookings.

3.contact Page: -









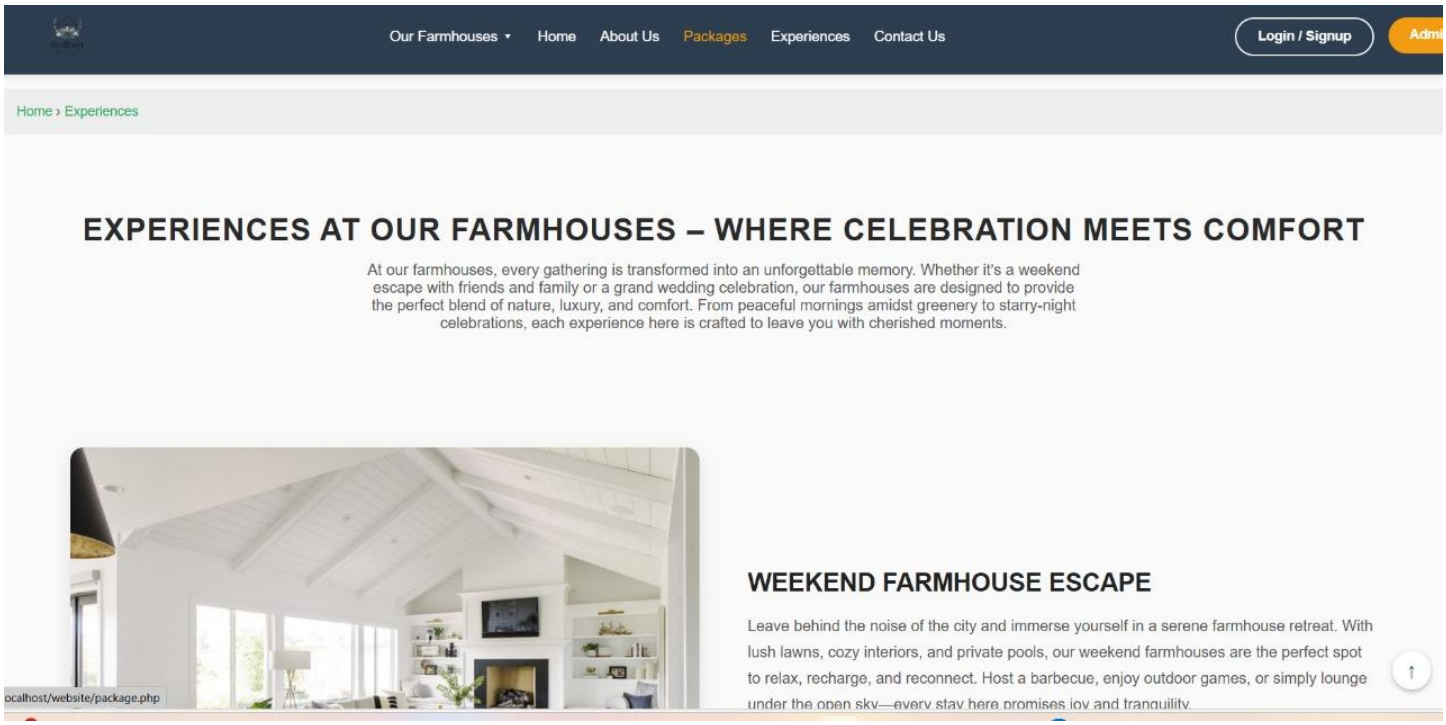
Purpose:-

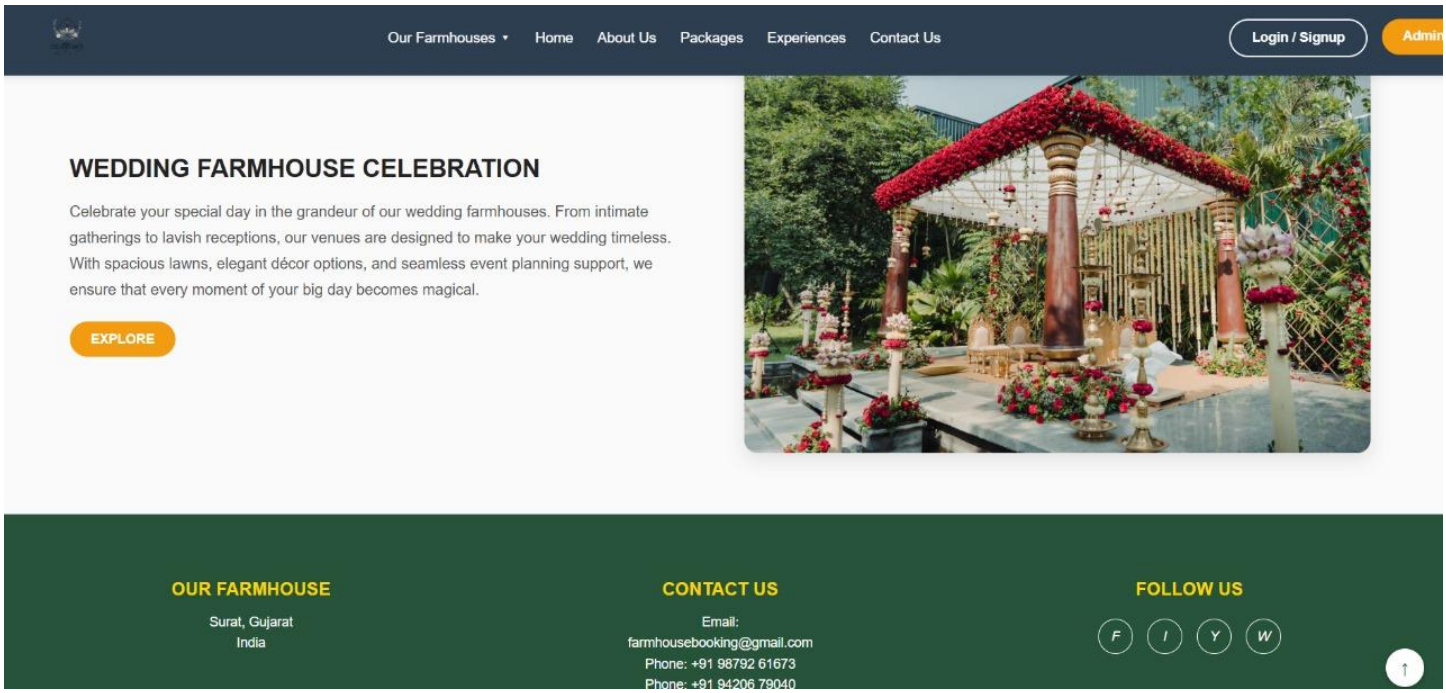
- The purpose of the *Contact Us* page is to provide customers with an easy way to connect with the farmhouse booking service for inquiries, support, and event-related queries. It centralizes all essential contact details such as phone numbers, email, address, and working hours to ensure users can quickly reach out. Additionally, it helps visitors submit queries directly through the form, enhancing customer engagement and support. This ensures customers feel connected and guided throughout their booking journey.

Design Goals

- The design goal of the page is to create a visually appealing, user-friendly, and professional interface. With a farmhouse-themed background, transparent overlays, and hover effects, the layout maintains elegance while ensuring readability. The use of structured sections like introduction, contact info, help section, and form keeps content organized and accessible. Responsiveness, form usability, and modern animations aim to deliver a smooth user experience while reflecting trust and professionalism in the booking platform.

4. EXPERIENCE:-





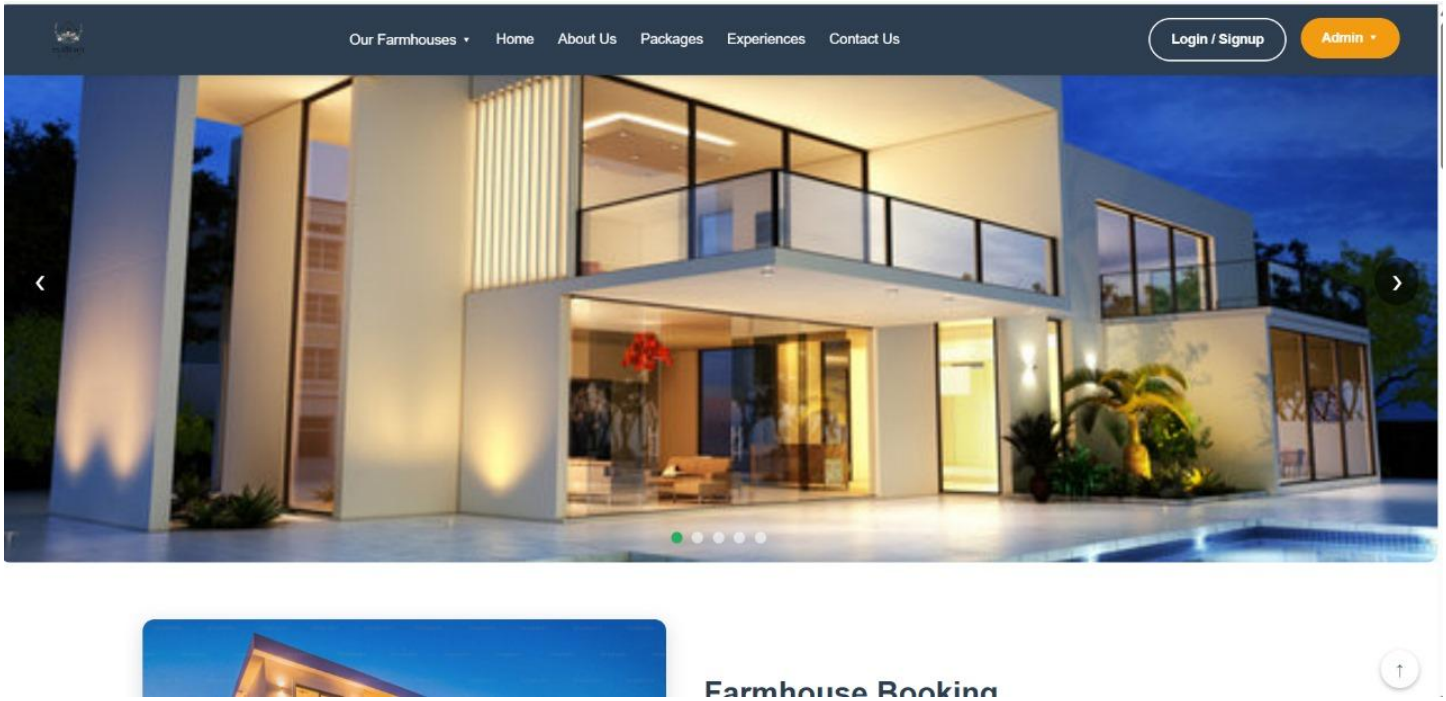
Purpose

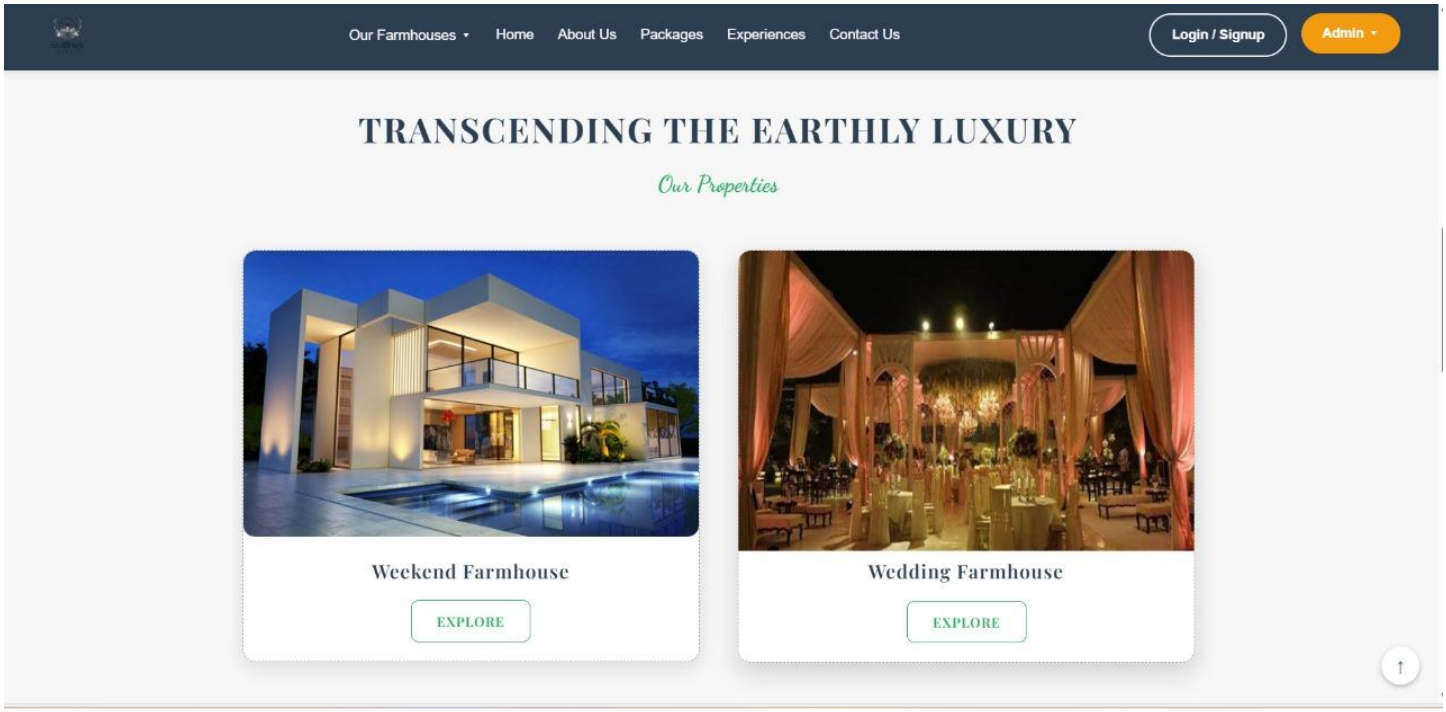
- The purpose of this page is to showcase farmhouse experiences that guests can book, with a special focus on weekend getaways and wedding celebrations. It highlights the unique offerings of each category, such as comfort, nature, and celebration, while guiding users toward the dedicated detail pages. By combining descriptive content with attractive visuals and clear calls-to-action, the page aims to engage visitors and encourage them to explore booking options further.

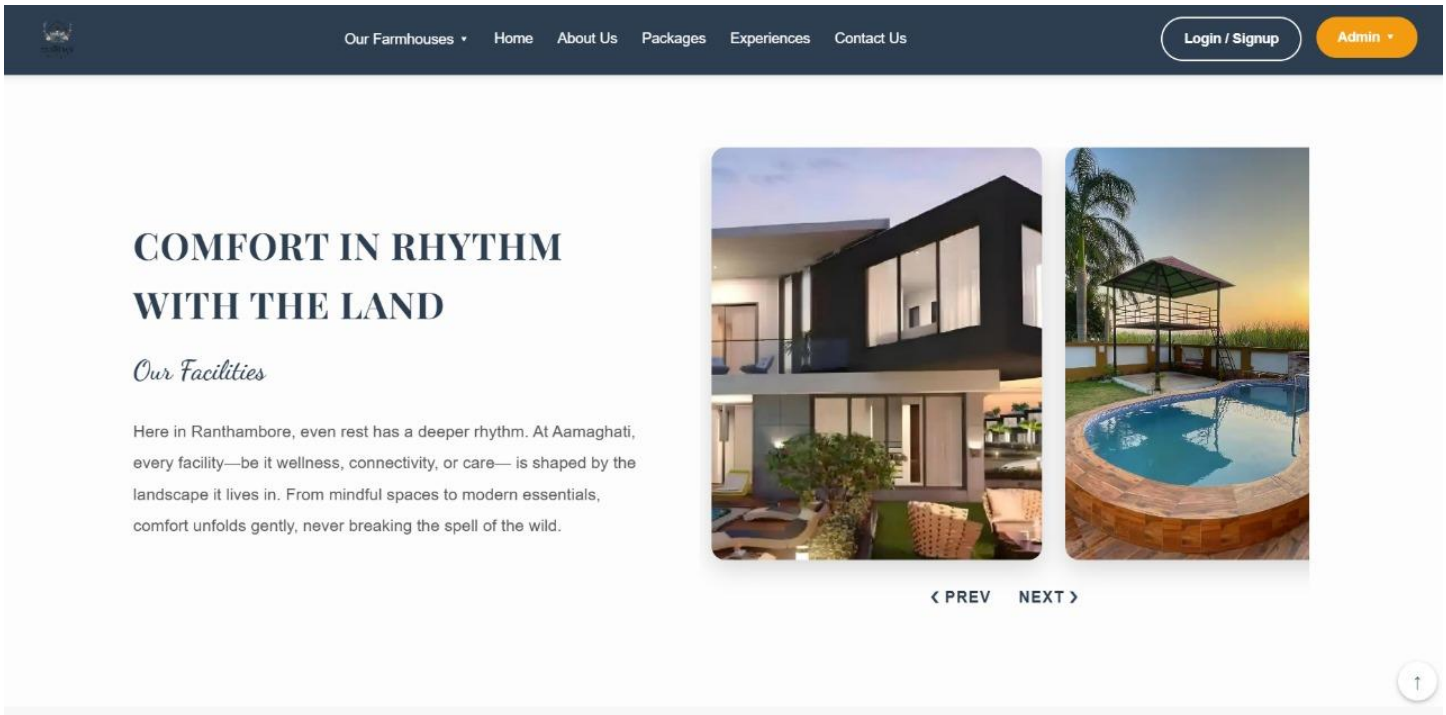
Design Goals

- The design goal of this page is to create a visually engaging and structured layout that balances aesthetics with functionality. Large banner imagery and clear sectioning emphasize each experience, while alternating layouts ensure variety and readability. Buttons with hover effects direct users toward booking details, while responsive styles make the layout accessible across devices. The overall design aims to blend elegance, clarity, and usability, ensuring visitors can easily understand and explore the farmhouse experiences offered.

5. weekend page







Purpose

- The purpose of this page is to present **weekend farmhouse packages** available for booking, providing clear details about pricing, guest capacity, and included amenities. It acts as a dedicated section where visitors can explore different farmhouse options—small, luxury, and private pool villas—designed specifically for **weekend stays**. This helps users quickly compare packages and choose the one that fits their requirements.

Design Goals

- The design emphasizes **clarity and elegance** by using a hero header, breadcrumb navigation, and neatly structured **package cards** with hover effects. Each package highlights amenities and pricing in a visually appealing format, using checkmarks for readability. A special note reinforces booking

conditions, ensuring transparency. The overall goal is to create a **user-friendly, attractive layout** that encourages quick decision-making and smooth navigation toward reservations

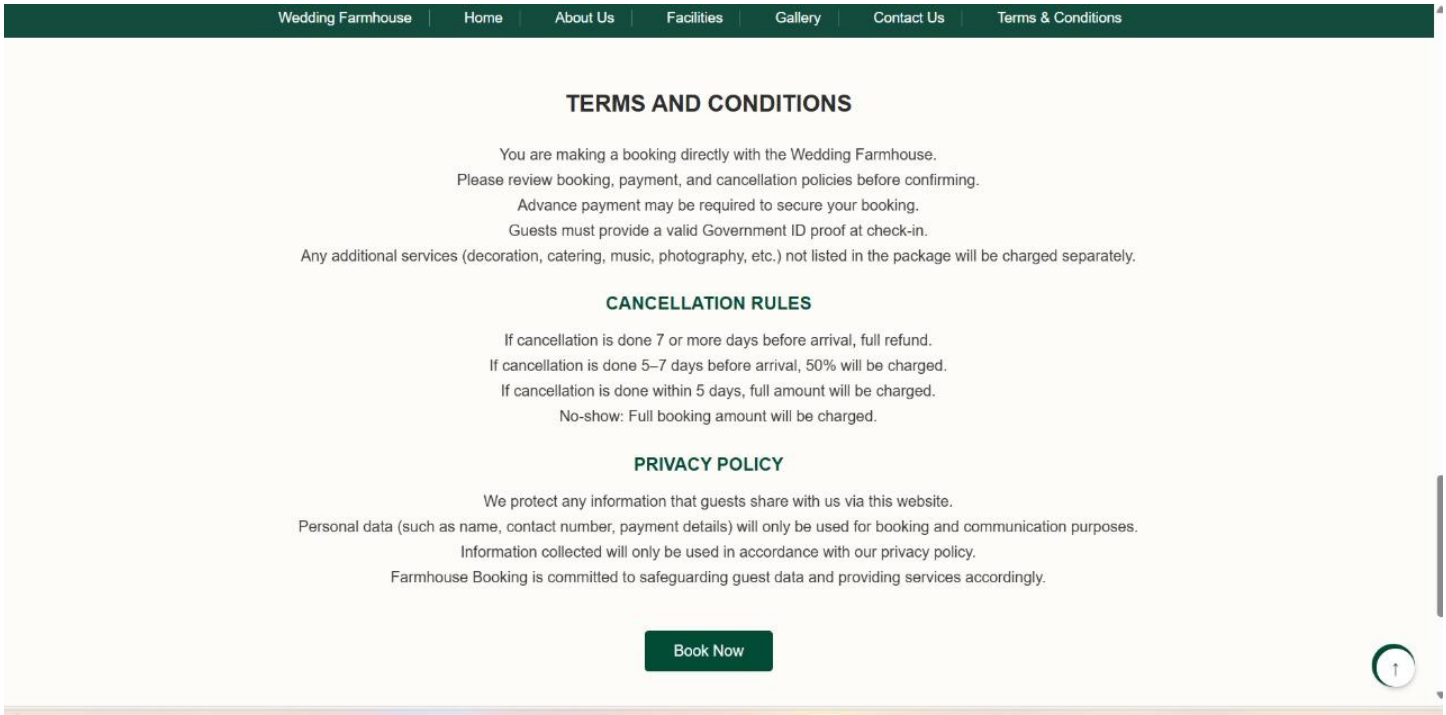
Phone number - +91 98792 61673 | +91 94206 79040
Email ID - farmhousebooking@gmail.com



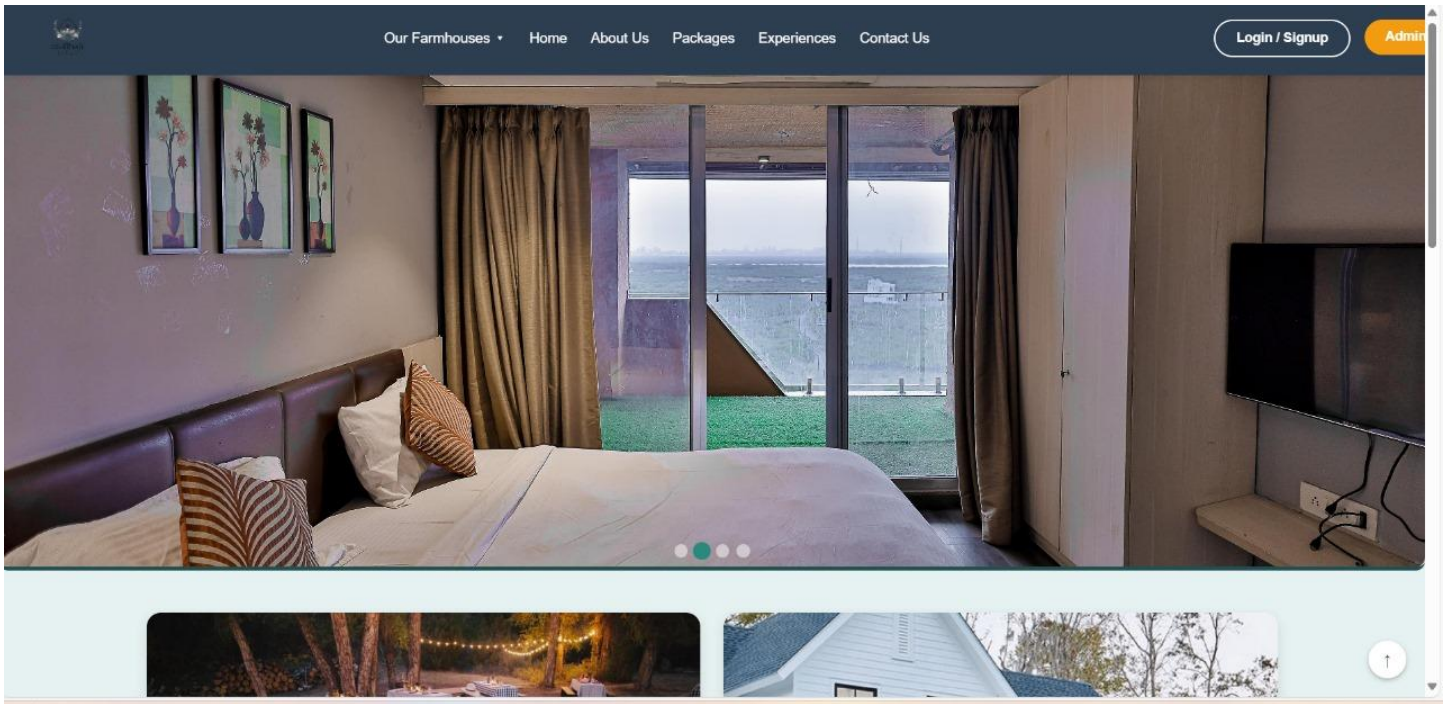
Purpose:-

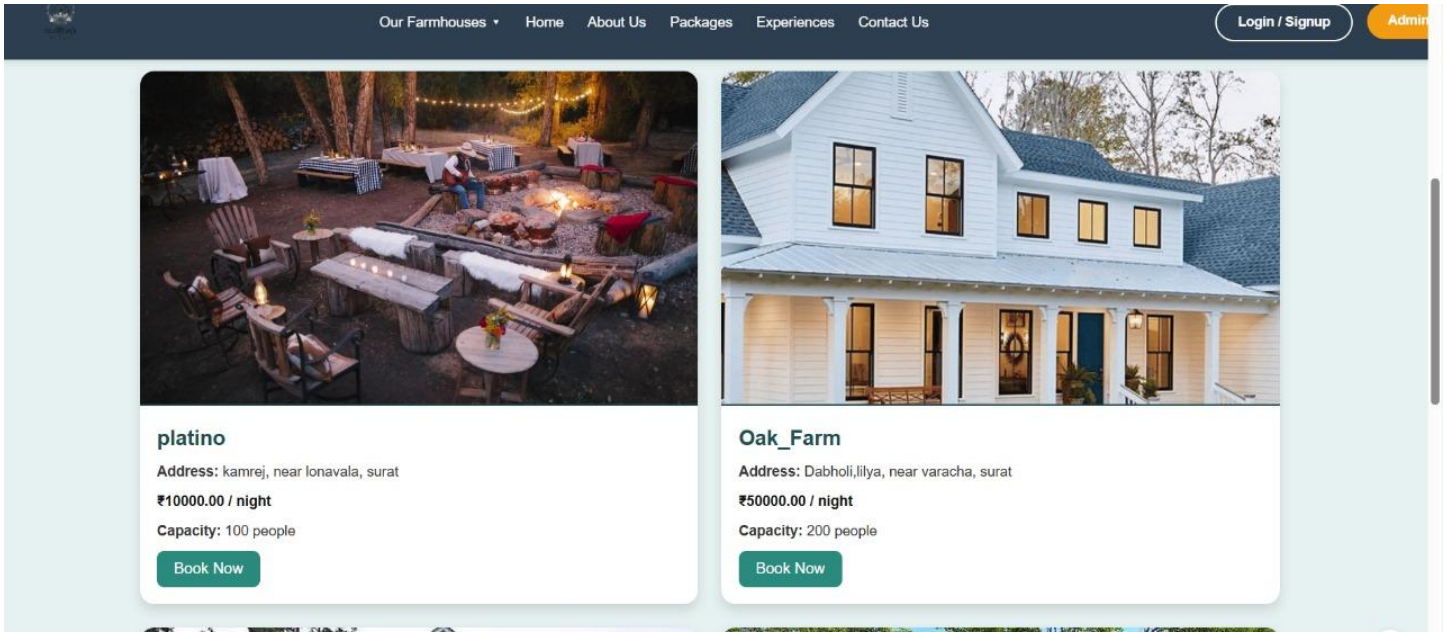
- The purpose of this page is to present wedding farmhouse packages tailored for different scales of celebrations, from intimate gatherings to grand royal weddings. It gives users clear package details such as guest capacity, included amenities, and pricing with GST. The page works as a dedicated wedding deals showcase, helping couples and families easily compare options and make informed booking decisions.

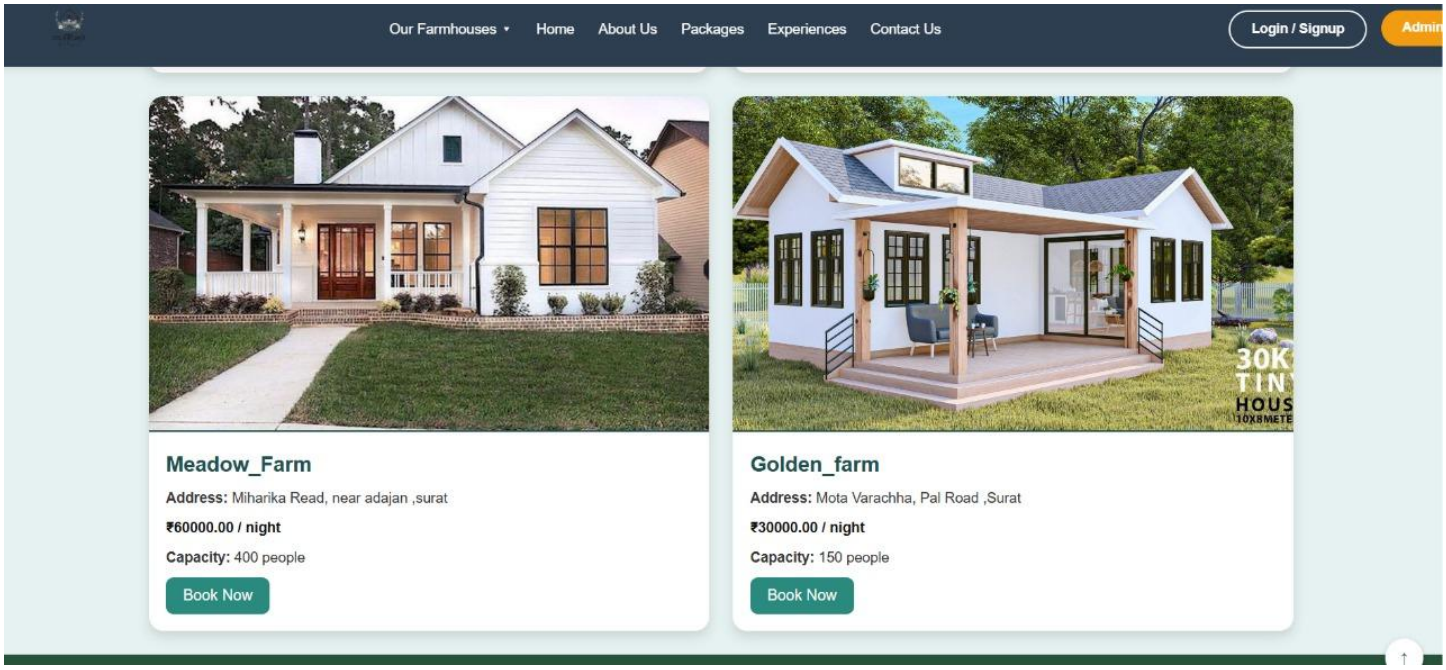
Design Goals:-

- The design focuses on creating an elegant, festive, and trustworthy layout with a wedding-themed hero banner and breadcrumb navigation for easy orientation. Each package is displayed in a card-style box with shadows and rounded corners, ensuring clarity and visual appeal. Color contrasts, typography, and highlights emphasize pricing and perks, while a closing note reassures users about support and decoration consultation. The goal is to combine aesthetic presentation with functional clarity to encourage direct inquiries and bookings.

7. weekend book page :-







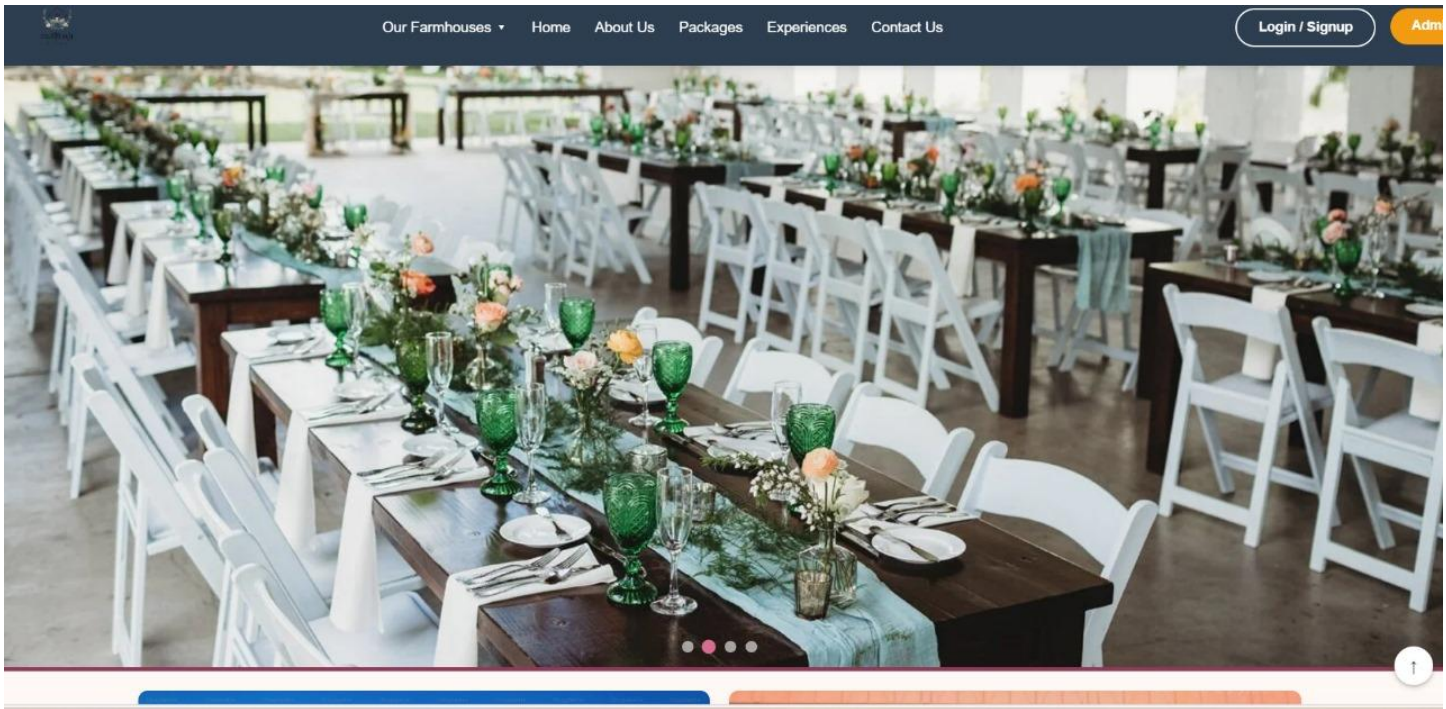
Purpose:-

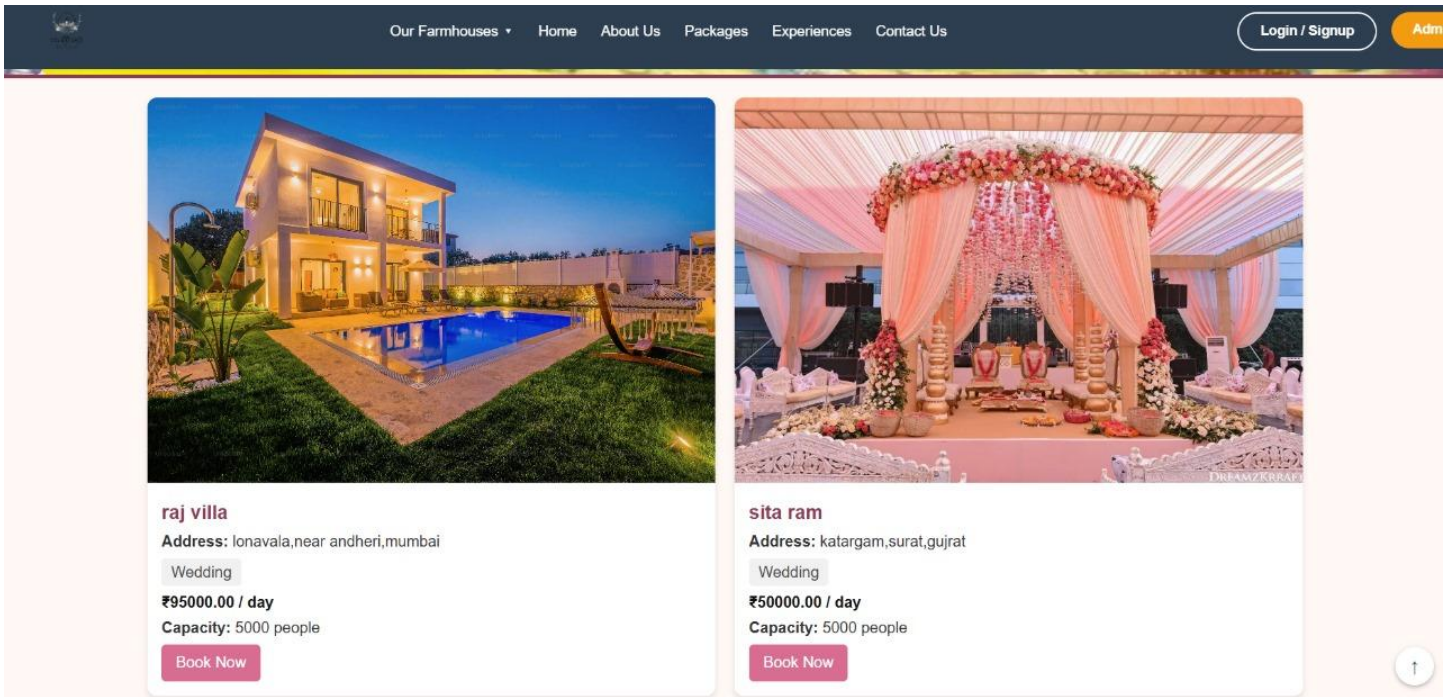
- The `wedding_booking.php` page is made to show wedding farmhouse packages in a clear and attractive way. It gives visitors full details about the farmhouse, like stay, food, fun activities, and the natural surroundings. With text and image galleries, users can easily understand what is offered. Navigation is simple with a menu and breadcrumb for quick section changes. The page is designed to keep visitors engaged and guide them to make inquiries or bookings.

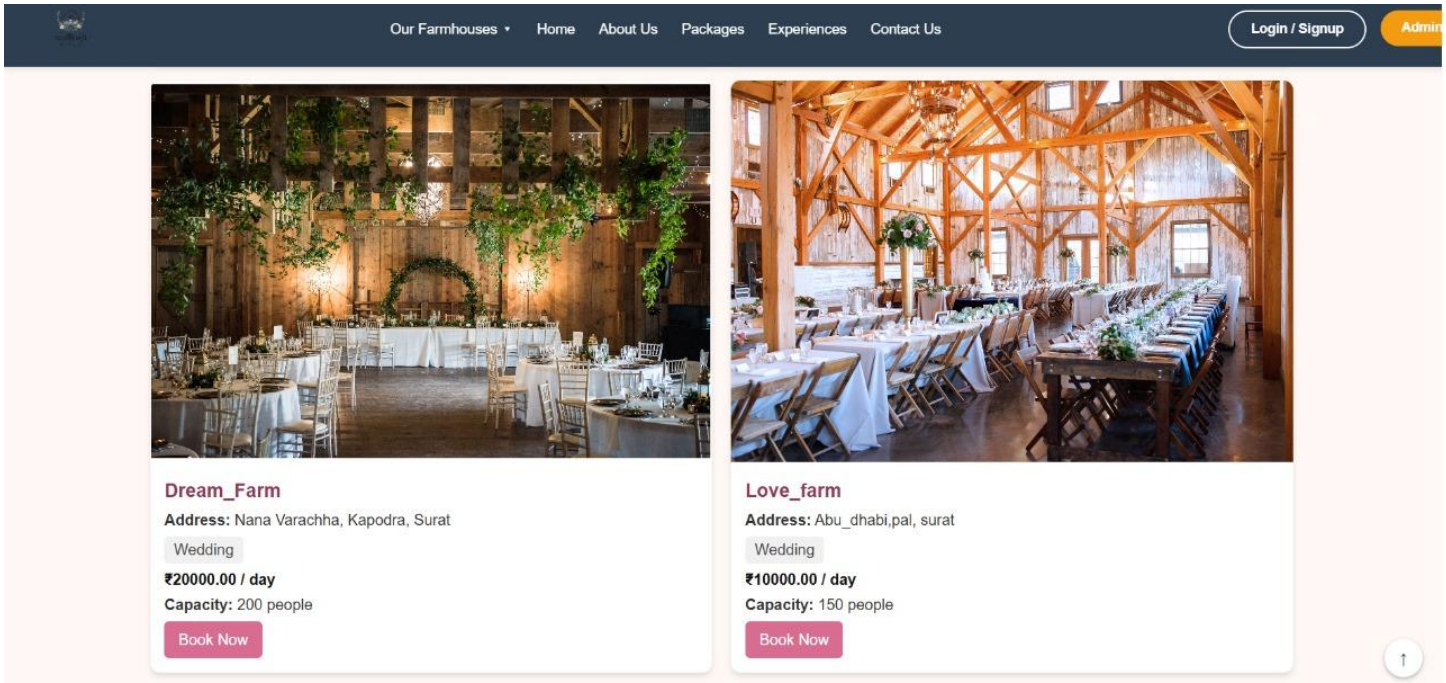
Design Goal:-

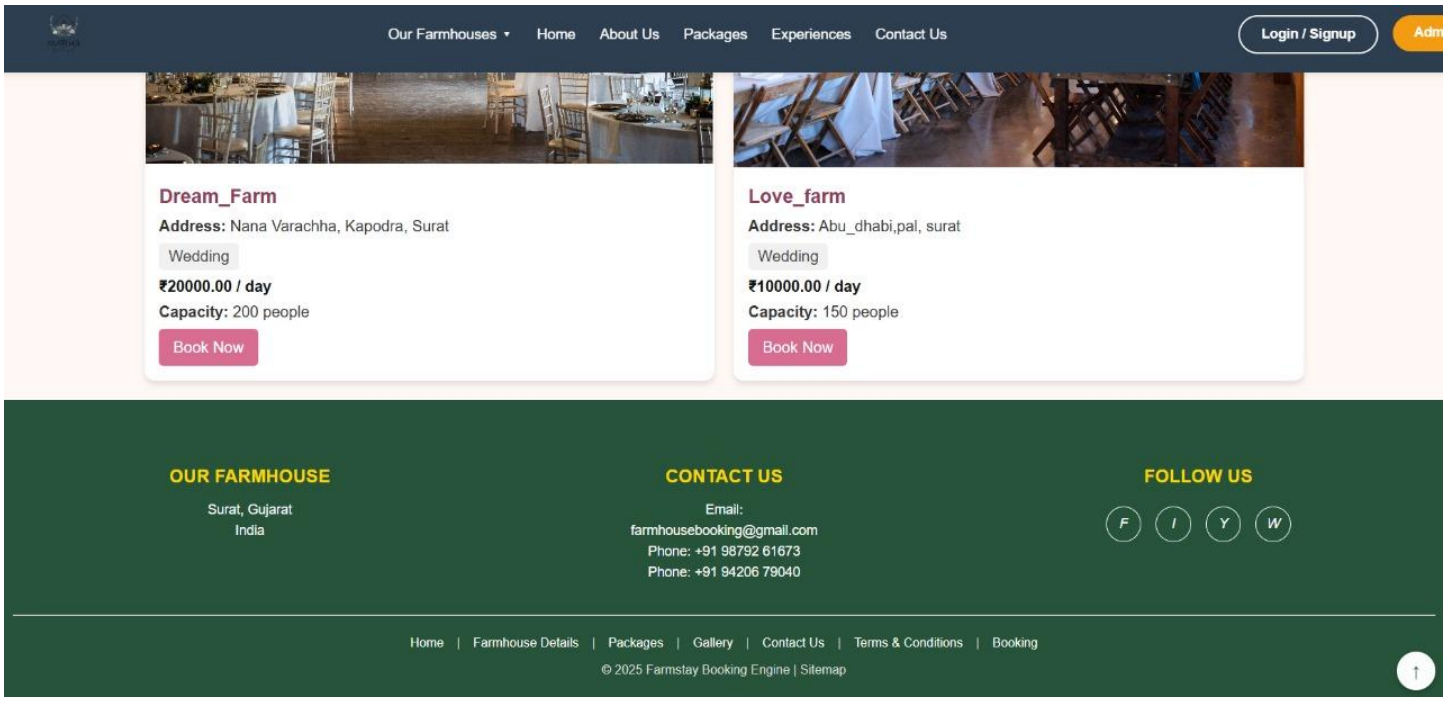
- The design goal of this page is to make it look elegant, simple to use, and match the theme of a wedding farmhouse. Soft colors, modern fonts, and a clean layout give it a classy yet welcoming feel. Features like sliding image galleries and smooth transitions make the page more engaging, and the responsive design works well on all devices. A clear “Contact Us” button helps guide visitors to take action. Overall, the design combines beauty with ease of use to give a smooth and pleasant experience.

8. wedding book page :-









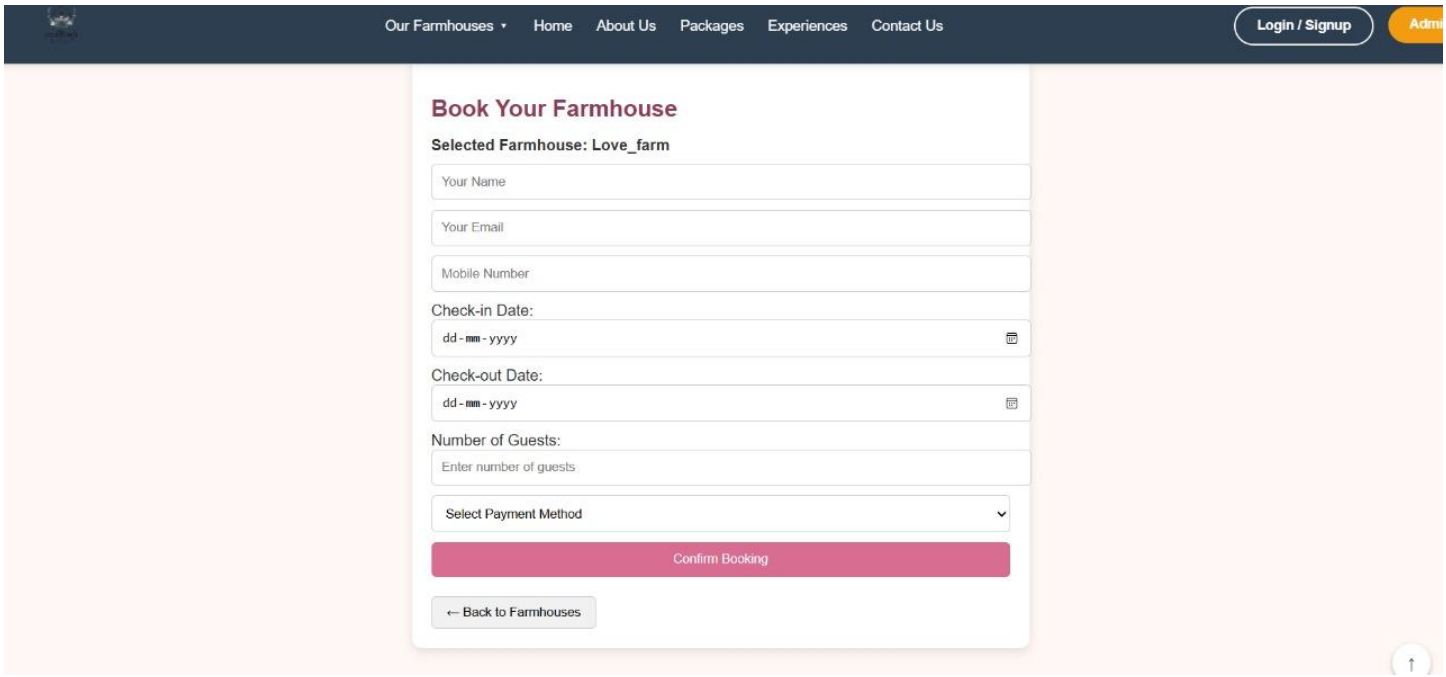
Purpose:-

- The purpose of this page is to give visitors a simple and easy way to explore and book wedding farmhouses. Users can see different farmhouses with their names, details, prices, and pictures, and then book directly through the form. The system saves all booking details like name, email, phone, dates, number of guests, and payment method into a secure database. This makes sure every booking is recorded safely. The page also has a slider, farmhouse showcase, and booking form to guide users step by step from viewing to booking.

Design Goal:-

- The design goal of this page is to make the booking system look attractive, simple to use, and work well on all devices. Soft colors, neat layouts, and sliding images create a pleasant first impression. Farmhouse cards show pictures, details, and prices in a clear way, while the booking form is kept simple and easy. Smooth navigation and clear “Book Now” buttons help users explore easily and complete bookings without confusion. Overall, the design mixes beauty with ease of use for a smooth experience.

9. Final booking page :-



-

Purpose:-

- To allow customers to book a farmhouse online by filling details like name, contact, check-in/check-out dates, guests, and payment method.
- To provide a user-friendly interface for quick and hassle-free booking.
- To ensure all required information is collected in a structured way before confirming a booking.
- To act as a bridge between customer and farmhouse management system for smooth reservations.

Desing goals:-

- Simplicity: Keep the form clean and easy to understand for all users.
- Consistency: Use the same theme, colors, and font style as the rest of the website.
- Responsiveness: Ensure the form works smoothly on desktop, tablet, and mobile devices.
- Clarity: Each field should be clearly labeled (Name, Email, Mobile, Dates, Guests, Payment).
- Validation: Prevent wrong inputs (like invalid dates, empty fields, or incorrect email format).
- Accessibility: Provide placeholders, dropdowns, and calendar pickers for user convenience.
- Navigation: Easy option to go back to the farmhouse listing page.
- Security: Secure handling of personal details and payment selection.
- Aesthetic Appeal: Use soft colors, rounded corners, and balanced spacing for a professional look
